

BRIGHTWELL INDUSTRIES

POWDER COATING • ANODIZING • ALUMINIUM EXTRUSIONS

Vashi, Navi Mumbai | Serving Industry Since 1990

COMPANY PROFILE

3

6 Years of Surface Finishing Excellence

ABOUT US

Brightwell Industries is a Vashi-based (Navi Mumbai) surface finishing company specialising in powder coating and anodizing of aluminium extrusions. For the past 30 years, we have built a reputation among fabricators, architects, and OEMs for consistent quality, reliable turnaround, and finishes that hold up to real-world use.

Three decades in this line of work have taught us what matters most to our customers: colour consistency batch after batch, coatings that don't chip or fade, and delivery schedules we actually keep. That focus has kept us running and growing since 1990.

Core Processes

Vashi

Navi Mumbai Facility

OUR SERVICES

We offer two core surface-finishing processes, both dedicated to aluminium extrusions:

- Powder Coating – Electrostatic application of durable, weather-resistant powder finishes in a wide range of colours and textures (matte, glossy, textured, metallic) for architectural and industrial aluminium sections.
- Anodizing – Electrochemical anodizing that builds a hard, corrosion-resistant oxide layer on aluminium extrusions, available in natural, colour, and satin finishes.
- Pre-treatment – Degreasing, etching, and chemical conversion coating to ensure proper adhesion and long-term finish performance.
- Handling of extrusions for architectural facades, windows and door sections, railings, industrial profiles, and custom fabrication projects.

WHY CHOOSE US

- 30 years of hands-on experience exclusively in aluminium extrusion finishing.
- Strategically located in Vashi, Navi Mumbai, with easy access for pick-up and delivery across the MMR industrial belt.
- Consistent colour matching and finish quality across large production batches.
- Dependable turnaround times built on decades of process discipline.
- Long-standing relationships with fabricators, architects, and extrusion suppliers.
- Approved applicators of Jotun and AkzoNobel

OUR COMMITMENT TO QUALITY

Every batch that leaves our facility goes through careful pre-treatment and process control to ensure the coating or anodized layer bonds properly and performs over time – resisting weathering,, and everyday wear. Three decades of repeat business is our clearest quality record.
